Uzair Ahmed

Software Engineer | AI / ML engineer Intern | Python | Django
Karachi Division, Sindh, Pakistan

Summary

Converting 'Hello World' into the code that, with ease and skill, transforms tomorrow.

I'm pursuing the goal of becoming a skilled Software developer and influencing the direction of software engineering.
and the last for the master in AI and ML

I received my diploma in software engineering from Aptech Learning in Karachi. I worked on a few projects while I was an intern there as well.

I am a technology enthusiast who finds professional joy in using technology's revolutionary potential to promote positive change. I have experience with web development using .Net and SQLServer, machine learning using Python, and data structures and object-oriented programming in Python. My biggest strength is my willingness to learn, even though I may be lacking in some talents.

Outside of technology, I enjoy drinking tea, singing a lot, and spent my school days exploring theatre.

Experience

Awesome Technologies Inc.
AI Software Engineer
July 2024 - Present (1 month)
Pakistan
